

fcc chairman, please leave the xm weather and traffic alone, i feel it is a great service to the prof, driver as well os other travlers that have a subsription to the xm radio. please tell the natioal assoc of bradcasters to wake up and leave xm radio alone as well as any other subription based serv that would like to add this type of serv to there line up. as an xm subsriber i pay for thisw serv and i like it as i am an prof. driver and find it usfull to plannin my route though and around these cities that it is currently offered for, as i can route around it or just get off the road before adding to the traffic probalms.
